The Need of Environmental Awareness

The state of our rivers and oceans is a sad comment on our social behaviour. We are using them as dumping grounds and dustbins. Millions of tonnes of rubbish is dumped into them every year. We are polluting not only our waters, but also the land and the air. In fact, we are digging our own graves. Therefore, it is in our own interest to keep the environment free from pollution. Ans :

Respected Principal, teachers and my dear friends!
I, Gaurav student of Xth class, present my views on The Importance of Traffic Lights. Traffic lights are very important for our safety. These ensure an order. Vehicles can run smoothly. Pedestrians can also use zebra crossing. Traffic lights create a system. These save a number of accidents. These save loss of life, property and safety of small and heavy vehicles. The green light is for 'going' and the red light is for 'stopping'. The yellow light is for getting ready'. For safe driving one should follow the rules of traffic lights.
Thank you.
